

U.S. ARMY AVIATION CENTER OF EXCELLENCE MODERNIZING THE FORCE FOR LSCO

2-4 AUGUST 2022

FORT RUCKER, ALABAMA

HOME OF ARMY AVIATION

U.S. ARMY

WELCOME

On Behalf of Brigadier General Michael C. McCurry, Commanding General, U.S. Army Aviation Center of Excellence and Fort Rucker, as well as MWR, we would like to welcome you to the 9th Annual Army Aviation Industry Days here on Fort Rucker.

After a highly successful expo in 2021, Fort Rucker is excited to host Aviation Industry Days once again. This year's event welcomes over 300 industry participants and over 50 exhibits that include experts from across this great nation and showcases some of the latest and greatest in aviation technology.

Booths and static displays will be open from Wednesday at 0830 and will remain open until 1630, and Thursday from 0830 until 1230. We have an impressive schedule of briefings that include leaders, experts and some of the top minds in Military and Civilian Aviation. Briefings and discussion panels will begin Wednesday at 0800 at the Post Theater and are scheduled at various times throughout the day concluding at Noon. Briefings will resume on Wednesday at The Landing inside the "Legends Room" at 1330 and will conclude at 1500. Thursday briefings will also be located at The Landing inside the "Legends Room" from 0800 until 1120.

While Aviation Industry Days is all about modernizing the force there will be time for some fun and opportunities to socialize with colleagues in a more relaxed environment. A social event is scheduled for Tuesday at Silver Wings Golf Club, our 27-Hole Championship facility, which is open year-round. The course has outstanding Champion Bermuda Greens and one of the most challenging layouts in the region. The facility boasts a fully stocked Golf Shop, Divots Restaurant & Grille, meeting & banquet rooms, and a 300-yard-long Practice Range.

The second of our social events will be held at The Landing on Wednesday evening. The Landing is our premier banquet and event facility which also houses Welcome Home Catering, the catering service that will be providing the food and beverage services throughout Industry Days. In addition, a Starbucks Coffee Zone is also located inside the facility for your convenience.

Whether you are an attendee, participant, sponsor, or partner of this year's Aviation Industry Days we would like to thank you for your support of the United States Army Aviation Center of Excellence, its Soldiers and their Families here on Fort Rucker.

**AECHELON
TECHNOLOGY**

Aechelon Technology, Inc.....6
Aechelon Technology, Inc. is a leading provider of visual simulation image generators, associated geospecific visual and sensor databases, realistic 3D models, and integration services for the US Government and Government Prime Contractors. Throughout its twenty three year history, Aechelon Technology has maintained an unparalleled track record in program deliveries for the US Marine Corps, US Navy, US Air Force, US Army, Special Operations Command, the US State Department Foreign Military Sales programs and the US Coast Guard, with all excellent Past Performance Evaluations. Iligence.

AeroVironment.....36
At AeroVironment, we never limit ourselves only to what we can attain today. We are relentless in our efforts to deploy technology in ways that push beyond the realm of the possible—and to deliver technology solutions that provide valuable new capabilities to our customers well into the future. Our innovative unmanned aircraft systems are designed to broaden our customers' horizons, enabling them to see the world in powerful, new ways and to tackle challenges that previously seemed insurmountable. When the mission is critical, AeroVironment is there, helping people gain the actionable intelligence.

AIRBUS

AIRBUS.....10
AIRBUS is the leading supplier of helicopters in the United States, with a market share of nearly 65% and a presence dating back more than 50 years. A team of more than 725 employees operates local production and completion facilities for the H125 and UH-72 Lakota aircraft in Columbus, Mississippi, and provides world-class training, aftermarket support, and technical assistance from Grand Prairie, Texas, for the North American regional in-service fleet of nearly 3,100 helicopters.

Amentum.....1
Amentum is the premiere destination for all aviation service needs: manned and unmanned. Amentum's high performance teams deliver innovative maintenance, sustainment, operations, and training solutions - deploying workforce, materiel and technology capabilities wherever needed. We have deep experience on over 200 different aircraft model/design/series of every type. Amentum is a global leader in mission-essential, complete life-cycle aviation service solutions. Throughout more than a century of partnership with the Army, we remain committed to Soldier and unit readiness and stand ready to support in all domains.

Area-I.....16
Dedicated to the development of advanced Unmanned Aircraft Systems (UAS), Area-I is quickly becoming the go-to source for Tube-Launched, Tube-Stored aircraft, such as its ALTIUS platforms. We offer an array of specializations

in aerodynamics, autonomy, mechanical design and prototyping, systems integration, flight controls, and flight testing of unmanned systems from initial concept to demonstration. Located just outside of the Atlanta perimeter, Area-I has captured a unique environment where our employees bring ideas into reality.

Areté.....42
Areté is an advanced science and engineering company that provides innovative solutions — from scientific discovery through production. Arété's smart systems include active and passive sensors, real-time processing, software, and complex algorithms that operate from seafloor to space.

ASTi.....34
ASTi has been at the vanguard of innovation for live and simulated training solutions since 1989. ASTi's capabilities include Radio-over-IP (RoIP) bridging; tactical system emulation; distributed, simulated voice communications; AI and speech-enabled, virtual role-players and simulated battlefield and cockpit sound environments. To learn more about ASTi, go to asti-usa.com.

AVT Simulation.....8
Applied Visual Technology, d.b.a. AVT Simulation, is an end-to-end systems integration and full-service modeling and simulation small business based in Orlando. AVT serves the simulation and training markets with professional engineering services and training solutions. AVT manufactures a reconfigurable collective rotary wing trainer called the Targeted Fidelity Apache Trainer (TFAT) and the desktop trainer, Apache Gunnery Trainer, in addition to modifications and upgrades to all simulator components (AGT). AVT Simulation is responsive, cost-effective, and accountable.

Bell.....31
Bell leads the way in Future Vertical Lift requirements with its Bell V-280 Valor FLRAA (future long range assault aircraft) and Bell 360 Invictus FARA (future attack reconnaissance aircraft) weapons systems. These next generation aircraft deliver major gains in speed, agility, lethality, and reach to support the maneuver force. As FARA and FLRAA move towards programs of record, Bell's digital design and advanced manufacturing technologies improve reliability, reduce lifecycle maintenance and servicing requirements, and reduce sustainment costs—all contributing to increased program affordability. We are ready to transform Army aviation to meet multi-domain battlefield challenges with the right talent, effective product capabilities, and the capacity to produce the next generation of military aviation. Learn more at bellflight.com/fvl.

Exhibitor Profiles

Boeing32
Boeing is the world's largest aerospace company and an innovative manufacturer of commercial, defense and space systems. Boeing products and services include commercial and military aircraft, satellites, weapons, C4ISR systems, launch systems, training, logistics and support services.

CATI Training Systems.....41
CATI Training Systems provides industry-leading simulation products and engineering services for government, commercial, and civilian organizations around the world. For over twenty years, CATI has been providing the aviation industry with unparalleled rendering performance through advanced software algorithms and optimizations. CATI image generator systems are the ideal choice for the visualization of simulation training systems. CATI's X-IG® Image Generator solutions provide high-fidelity visualization and are 100% COTS PC-based and specifically designed around industry-standard OpenGL®, and OpenFlight®, the 3D standard format for the visual simulation industry. The X-IG® suite of tools and programs offers superior image fidelity, realism, and ease of integration with most simulation devices. Open architecture, COTS tools, and flexible interface options make X-IG® one of the most user-friendly options on the market. Low acquisition, low overhead, and reduced support costs also make it one of the most cost-effective simulation training solutions available.

Collins Aerospace.....11
Collins Aerospace, a unit of Raytheon Technologies (NYSE: RTX), is a leader in technologically advanced and intelligent solutions for the aerospace and defense industry. Created in 2018 by bringing together UTC Aerospace Systems and Rockwell Collins, Collins Aerospace has the capabilities, comprehensive portfolio and expertise to solve customers' toughest challenges.

Cummins Aerospace.....4
Cummins Aerospace delivers integrated, affordable engineering solutions for complex systems. Capabilities encompass Model Based Systems Engineering, modeling & simulation, software engineering, design engineering, and advanced manufacturing. Cummins Aerospace is an AS9100 Rev D certified company committed to quality, technical excellence, and customer satisfaction.

Dynamic Aviation5
Since 2003, Dynamic Aviation has been supporting Aerospace and Defense missions worldwide for both domestic and foreign governments. Incorporating the latest technologies, our company flexes to provide our customers with the most leading edge, cost-effective, and innovative aviation solutions. We source, overhaul, modify, fly, and maintain aircraft while providing an aircraft operational availability and reliability rate of 98%, derived from our finely tuned integration and modification processes. Our quick reaction capabilities and comprehensive solutions include engineering design, fabrication, modification, integration, certified aircraft maintenance, flight testing, operations, maintenance, sustainment, installation, and certification. As an industry leader in aircraft modification, we have integrated an array of systems and technologically diverse sensors/detectors to include: EO/IR, MSI/HSI, SARs, FMV cameras,

COMINT, BLOS, LOS, ASE and SATCOMS. With more than five decades maintaining and operating aircraft at our privately-owned, public airport, Dynamic Aviation provides unobtrusive and tailored aerial solutions for our customers. We offer flexible contracting solutions such as: Contractor-Owned, Contractor-Operated (COCO) and Government-Owned, Contractor-Operated (GOCO) options. With our extensive fleet of aircraft and experienced aviation professionals, you can rely on Dynamic Aviation to rapidly develop, deploy, and sustain the mission-capable aviation assets you need.

Elbit America.....21
Elbit America, headquartered in Fort Worth, Texas, is a leading provider of high-performance products, system solutions, and support services focusing on the defense, homeland security, law enforcement, commercial aviation, and medical instrumentation markets. With facilities throughout the U.S., Elbit America is dedicated to supporting those who contribute daily to the safety and security of the United States. For additional information, visit: www.ElbitAmerica.com or follow us on Twitter, LinkedIn, or Instagram.

GasTOPS Inc. (GTI).....30
GasTOPS Inc. (GTI) is a service-disabled, veteran-owned small business, headquartered in Huntsville, Alabama. GasTOPS provides technical solutions for machinery diagnostics, prognostics, and health monitoring through the application of advanced fluid measurement and analysis technologies. These solutions enable Condition Based Maintenance (CBM), Prognostics and Predictive Maintenance (PPMx), and have been successfully applied to critical assets in the aviation, defense, power generation, marine, and transportation industries. Together with our partners, we have deployed over 10,000 onboard sensors with over 10 million operating hours since 1995 including systems on Pratt and Whitney's F119, F135, and Geared Turbo Fan (GTF) engines. Our offboard system, ChipCHECK, was recently selected by the US Air Force to provide analytical debris classification and analysis for the F110 engine family for both US and FMS customers.

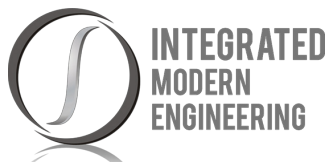

GE Aviation.....39
GE Aviation, an operating unit of GE (NYSE: GE), is a world-leading provider of jet, turboshaft and turboprop engines, components, integrated digital, avionics, electrical power and mechanical systems for commercial, military, business and general aviation aircraft. GE has a global service network to support these offerings. For more information, visit us at <http://www.geaviation.com>. Follow GE Aviation on Twitter at <http://twitter.com/GEAviation> and YouTube at <http://www.youtube.com/user/GEAviation>.

General Atomics Aeronautical Systems.....27
A lot is happening at General Atomics Aeronautical Systems, the world leader in Unmanned Aircraft Systems. We're modernizing the Gray Eagle Extended Range UAS to accelerate decision dominance in Multi-Domain Operations. Conforming to MOSA principles and FACE 3.x standards, the next evolution Gray Eagle-ER leverages industry collaboration through open architecture

Exhibitor Profiles

and modularity. This enables rapid upgrades and obsolescence avoidance to remain competitive in large-scale combat operations with increased capability and survivability. Upgraded avionics provide improved data links, processing speed, and data storage facilitating a versatile payload of multi-intelligence sensors helping commanders decide, act, and survive on complex battlefields. System ground modernization provides portable and scalable laptop solutions increasing user simplicity and mission versatility while significantly reducing equipment footprint and deployment complexity. The upgraded GE-ER accomplishes advanced teaming through the ability to launch a family of Air Launched Effects increasing situational awareness while providing Stand-off Survivability with Stand-in Capability (SOS-SIC). www.ga-asi.com

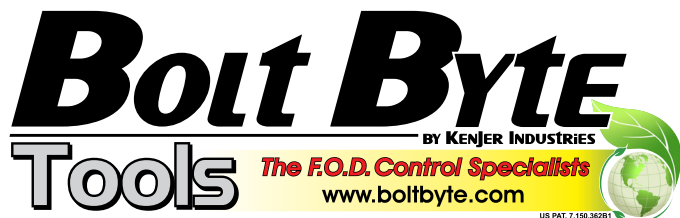

Integrated Modern Engineering.....37
Integrated Modern Engineering provides a geospatial solution ELA for 3D terrain in a heads up display for pre-flight mission readiness. ELA adds layers of intelligence data from EO/IR sensors, radars, satellites, and open-source feeds providing situational awareness. ELA brings terrain onto Oculus and HoloLens for collaboration on a digital twin display of an operational common intelligence picture (CIP). ELA is currently supporting the Army in AFRICOM and EUCOM.

Integration Innovation, Inc. (i3).....12
i3 was founded in December 2007 with the intent to do business differently. Our focus is to leave our team members and customers better than we found them—ultimately strengthening our Nation, our warfighter, and our company. Our goal is to create a culture that naturally produces growth by reminding people why they are relevant, knowing that leadership matters, and believing we can make a difference while making a living. We strive to create a positive environment that enriches the lives of our team members through a commitment to excellence, with a focus on Hypersonics, C4ISR, Cyber Security, and Interactive Training Solutions. At i3 we identify emerging needs, encourage innovation, and make a meaningful impact on our Nation, its allies, and our community.

Inter-Coastal Electronics (ICE).....9
ICE's embedded training solutions provide immediate interoperability with Aviation training ranges and CTCs. With extensive knowledge spanning 30 years, our innovative training solutions enhance readiness, sustain proficiency, and reduce cost. ICE employs the requisite skills to implement the total live training experience for Any Mission, Any Environment, Any Platform.

Bolt Byte.....35
Bolt Byte is a durable, reusable, time-saving organization tool, used by professional aircraft, automotive, motorcycle, train, and plane mechanics around the world. Bolt Byte is a must for any FOD Control Program as it organizes and controls: nuts, bolts, screws, and fasteners for all small to large mechanical repairs. The Bolt Byte maintenance program provides a "common sense" approach to maintenance procedures. Each board contains a picture and bolt pattern mirroring the object to be removed. The major task required of the maintainers during a PMI 1 or 2, is to put the bolt in the correct patented, pre-designed, cut hole. This is important because of different lengths of hardware and thread types. If this is not performed correctly the mechanic must restart

the same tasks due to damaged hardware or mechanical parts. Use of these boards improves both team and individual efficiency.

Lightspeed Aviation, Inc.....18
At Lightspeed Aviation, we design and manufacture technologically advanced Active Noise Reduction (ANR) aviation headsets engineered to provide you the quietest possible environment, unparalleled comfort and crystal-clear communications, making your flights safer and more enjoyable. This is why we are the most preferred, most awarded headset company on the market today. We also offer the only premium ANR and audio solution specifically engineered for aviation helmets. Our helmet modifications deliver remarkable Lightspeed comfort, quiet, clarity, plus all of the advanced features that our headset wearers have been enjoying for years—which is why Lightspeed is the choice of private and professional helicopter pilots worldwide. Our helmets reduce background noise, allowing for increased focus, better situational awareness, and less pilot and crew fatigue. As a company of pilots and flight enthusiasts, we strive to know our customers well and deliver an innovative in-flight experience.

Liquid Measurement Systems (LMS).....25
With over 30 years of experience, Liquid Measurement Systems (LMS) is dedicated to the design and manufacture of fuel measurement systems for primary and auxiliary fuel tanks, in rotary- and fixed-wing applications, and for the commercial and military aircraft markets. We have developed specific expertise in lightweight, strong, non-corrosive graphite composite probes, multi-functional analog/digital signal conditioners, and flight deck and refuel panel indicators. We proudly provide fuel gauging solutions for platforms at the leading edge of aerospace, and we deliver hardware for some of the industry's most iconic aircraft — where safety, reliability, and accuracy are paramount.

M1 Support Services.....33
M1 Support Services is the prime contractor providing quality maintenance and logistic support services to the aircraft assigned to the US Army Aviation Center of Excellence (USAACE), US Army Aeromedical Research Laboratory (USAARL), United States Air Force (USAF) and other tenant and satellite units supporting Fort Rucker, Alabama. M1 provides launch, recovery, and maintenance support for more than 500 hundred aircraft, 7 days a week, and 24 hours a day meeting the daily mission of approximately 300-500 flights to support the US Army and Air Force rotary-wing pilot training mission. If you are looking for a career opportunity second to none, M1 Support Services offers careers that challenge you. During the Industry Day our booth will be staffed with M1 Human Resource professionals that can discuss job requirements, current opportunities, and how you can apply to be a part of the M1 team. As M1 supplies contract services, parts and materials in support of the Fort Rucker contract, we will also have Procurement professionals available to discuss supplier or subcontractor opportunities and how your company can be added to our active supplier database.

Exhibitor Profiles

Mass Virtual.....20
Mass Virtual leverages the latest transformative XR capabilities by fostering a customer-involved culture, award-winning team, and enterprise software platform, MassXR. After fielding hundreds of XR solutions across the globe, the team at Mass Virtual has honed its expertise in advanced architecture design, delivering digital solutions that are beyond words. This team continues to evolve the training landscape by utilizing MassXR to digitize training overhead resulting in higher student retention, reduced time to train, and increased trainer availability. Our passionate team is built on a foundation of creativity, ethics, and collaboration resulting in an empowered workforce ready to solve your hardest challenges. www.massvirtual.com

McNally Industries LLC.....38
McNally's strength in design engineering coupled with deep manufacturing experience provides a unique capability for product development and re-engineering. Our team of experienced engineers specialize in collaborating with our customers to develop exceptional products that exceed mission requirements and our customers' needs. McNally's line of aviation ground support equipment has been deployed around the world, keeping our Soldiers safe and getting the job done.

Navigator International LLC (NI).....15
Navigator International LLC (NI) is a CVE certified, Service Disabled, Veteran-Owned, Small Business (SDVOSB) specializing in on-site programmatic logistic support to the Department of the Defense. Our corporate headquarters is in Huntsville, AL with regional offices located in Enterprise AL, Istanbul Turkey and Erbil Iraq. As an ISO 9001:2015 Certified company and trusted partner to our Government customers we provide aerospace and defense system integration, life cycle and logistical management support, systems engineering, software engineering, and training course development. We are a Small Business Prime on the AMCOM EXPRESS Logistics Domain with over 16 years of corporate experience providing professional acquisition, sustainment, and modernization engineering services. Since our founding in 2005, NI has been dedicated to providing our clients with timely, responsive, and affordable solutions to their challenging and complex problems. Enabling our customers' success is the foundation of NI's core mission and path to continued growth.

Northrop Grumman.....2
Northrop Grumman is a technology company, focused on global security and human discovery. Our pioneering solutions equip our customers with capabilities they need to connect, advance and protect the U.S. and its allies. Driven by a shared purpose to solve our customers' toughest problems, our 90,000 employees define possible every day.

Ombra22
Ombra is a Service Disabled Veteran-Owned Small Business based out of Tampa, Florida (SDVOSB) with extensive experience working with Special Operations and the Department of Defense. Our vision is to develop, test, field, and sustain cutting edge technology to overcome near-peer competitor capabilities. Ombra provides source selection, proposal, and white paper development as well as technical services to Industry partners. We also develop DoD technology studies to address tomorrow's biggest challenges. Ombra's extensive experience with service contracts and broad connections to Industry providers enables us to offer operations and sustainment services to continue supporting the customer after the technology is developed and fielded leading to a lifetime partnership with our clients. Ombra draws upon its experience serving SOF in science and technology, gunships, manned/unmanned systems, Intelligence, Surveillance, and Reconnaissance as well as Position, Navigation, and Timing to deliver cutting edge solutions to USSOCOM and the Department at large.

Pinnacle Solutions Inc.....7
Our Expertise: Founded in 2008, Pinnacle is a leading innovator and provider of flight and maintenance products and services, with proven expertise in training system development, sustainment, and modification; live, virtual, and augmented training environments; interactive multimedia instruction; and technical publication development.
Our Solution: Pinnacle provides hands on maintenance services and innovative training products spanning from 3D virtual environments and maintenance and flight training devices to virtual/interactive aviation mishap investigation courseware. Our common architecture and modular approach provide low-risk, cost-effective solutions supporting a customer base that includes DoD, Special Operations Forces (SOF), NASA, Embry Riddle Aeronautical University, commercial and international markets.

Plateau Grp.....23
Plateau Grp provides innovative and agile IT solutions to customer challenges. Plateau has developed industry-leading product solutions and services to address Environmental, Safety, and Occupational Health (ESOH) and Sustainability needs, for both Government and Commercial Customers. Plateau's current suite of applications has been designed for environmental compliance, environmental management systems (EMS), energy and sustainability.

S&K Support Services/AE&C3
S&K Support Services (SKSS) is a HUBZone Certified provider of rotary and fixed wing aviation maintenance support. The company currently provides provisioning of H-60, CH-47, AH-64, and OH-58 at Fort Rucker with aircraft maintenance and logistics services to meet pilot training requirements in a cost-effective manner. In addition, SKSS provides these same services at Columbus Air Force Base for the of T-1A, T-6A, and T-38C aircraft.

Exhibitor Profiles

Sagetech.....29
Sagetech is an aerospace technology company, empowering safe flight in crewed and uncrewed aircraft with certifiable situational awareness solutions. Currently serving military and civil duty on a broad range of UAV platforms, Sagetech solutions are mission-proven and offer decades of program experience, certifications, and millions of flight hours to deliver maximum value over the life of a platform. Today, Sagetech is expanding its technology platform to create comprehensive, certifiable systems such as detect and avoid solutions. Every day, Sagetech works to concert with its extensive ecosystem of OEM customers, technology partners, and resellers to ensure UAVs and crewed aircraft fly safer with Sagetech on board.

Science and Engineering Services (SES).....17
Science and Engineering Services (SES) is a recognized leader in system modification, integration, training, and total fielding support of rotary wing, fixed wing, and unmanned aircraft. We are a business which brings OEM-level capabilities, without the associated cost. Services range from prototype and fabrication through complex modification and integration. We are strategically located, have trained personnel, rapid contracting vehicles, and over 1.4M sq. ft. of world class manufacturing and integration facilities.

Sikorsky, a Lockheed Martin Company.....19
Sikorsky, a Lockheed Martin Company, is a world leader in helicopter design, manufacture and service. The company is based in Stratford, Connecticut, and was founded by aerospace pioneer and legend Igor Sikorsky in 1923 as the Sikorsky Aero Engineering Corporation. Sikorsky's fleet of more than 5,000 operational aircraft are supported by a global network, with approximately 13,000 employees around the world. The company has facilities, joint ventures or major supplier operations in Poland, Turkey, India, the United Arab Emirates and Australia. Major U.S. facilities are located in Troy, Alabama; West Palm Beach, Florida; and Stratford, Trumbull, Shelton and Bridgeport, Connecticut. Sikorsky continues to remain true to the legacy of Igor Sikorsky by exploring and introducing state-of-the-art technologies for both military and commercial markets that shape the industry.

Stevens Aerospace and Defense Systems40
Stevens Aerospace and Defense Systems, LLC ("Stevens") provides MRO (maintenance, repair, and overhaul) services on a wide range of aircraft produced by manufacturers such as Textron, Bombardier, Gulfstream, Pilatus, Dassault, and Embraer. Stevens presently operates facilities in Greenville, S.C. (GYH), Dayton, OH (DAY), Nashville, TN (MQY), as well as a 24-hour/365-day AOG (aircraft on ground) mobile maintenance division. Stevens is also a provider of depot level aircraft maintenance, refurbishment, and modification for federal, state, and local governments. All Stevens locations hold FAR Part 145 repair station certificates and Mexican AFAC certification. GYH also holds EASA certification and conforms to ISO9001: 2015, AS9110C, and DCMA 8210.1C guidelines. For more information, visit www.StevensAerospace.com.

Veraxx24
Veraxx creates high-fidelity solutions that enable pilots, aircrews and instructors to maximize mission readiness through integrated and networked multi-entity tactical training. Veraxx solutions provide realism—delivered on desktop systems, fully-immersive cockpit trainers and complete crew trainers with cabins—that ensures training scenarios and skills development are as close to actual flight conditions as possible, at substantially less cost and risk than flight time.

Viasat.....28
At Viasat, we're on a mission to connect every warfighter, platform, and node in the battlespace. As a global communications company, we power millions of fast, resilient connections for military forces around the world – connections that have the capacity to transform the mission – in the air, on the ground, and at sea. Our customers depend on us for connectivity that brings greater operational capabilities, whether we're securing the U.S. Government's networks, delivering satellite and wireless communications to the remote edges of the battlespace, or providing senior leaders with the ability to perform mission-critical communications while in flight. We're a team of fearless innovators, driven to redefine what's possible. And we're not done – we're just beginning.

Vinnell Arabia.....14
Aviation Professionals! Vinnell Arabia, is a defense contractor in Saudi Arabia and has over 40 years of success training the Saudi Arabian National Guard. Vinnell Arabia is a military knowledge transfer company, which delivers a full range of products and services for their combat aviation forces. They also deliver customized doctrine-based aviation training, full-scope maintenance, logistics support services and military translation solutions. They are recognized as a world class leader and provider of technical services, military training, program management, facilities operation/maintenance, educational and vocational training, as well as logistics support and Aviation training and support in the Middle East. Presently, Vinnell Arabia is recruiting prior and retired military personnel, as well as qualified civilian pilots and maintainers with current certifications and experience to become members of this world class team.

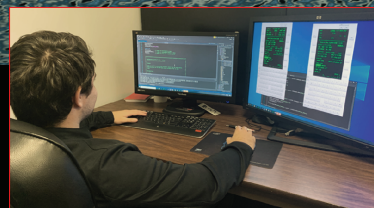

Safran 13
Safran is an international high-technology group, operating in the aviation (propulsion, equipment and interiors), defense and space markets. Safran has a global presence with 79,000 employees and sales of 16.5 billion euros in 2020 and holds, alone or in partnership, world or regional leadership positions in its core markets. Safran Helicopter Engines is the world's leading manufacturer of helicopter engines, with more than 75,000 produced since being founded. It offers the widest range of helicopter turboshafts in the world and has more than 2,500 customers in 155 countries. Safran Helicopter Engines produces the Arriel 1E2 turboshaft engine, used on the U.S. Army's UH-72A Lakota, as well as the Arriel 2E, found on the UH-72B Lakota.

ENTERTAINMENT

General Dynamics Information Technology (GDIT) Social @ Silver Wings Golf Club Tuesday August 2nd 1700-1900

GDIT

Join us as GDIT brings you the first of the two social events for Aviation Industry Days 2022. The first event will be held Tuesday August 2nd beginning at 1700 at the beautiful Silver Wings Golf Club. The evening will feature opportunities to network with your colleagues, a wonderful menu of heavy hors d'oeuvres prepared by Divots Restaurant & Grille and the Welcome Home Catering staff as well as music, giveaways, and a wonderful view from the back deck overlooking our championship golf course. We look forward to making new friends, connecting with other aviation professionals and kicking off Aviation Industry Days 2022. Thank you again to GDIT for sponsoring this wonderful event.

Wednesday Night Social @ The Landing Zone Wednesday August 3rd 1700-1900

BROUGHT TO YOU BY:

AIRBUS

TEXTRON Systems
► PUSHING PAST POSSIBLE

Industry leaders are invited to join us for the Wednesday night social beginning at 1700 inside The Landing Zone. The evening will feature another great opportunity to meet, greet, network and fellowship with other industry leaders and professionals. An impressive array of heavy hors d'oeuvres will be prepared by The Landing Zone and the Welcome Home Catering staff inside. Outside the Tiki Bar and patio area will be open along with an air-conditioned lounge tent, charging stations and music. Thank you again to Boeing, ARMA Global, Bell, Textron, Elbit America, and Airbus for making this wonderful event possible.

Evening Socials are reserved and open to registered industry partners, Aviation Industry Day staff and their guests only. Event Registration credentials are required. Registration is available and open to the public.
